

## PERCENTAGE POINTS OF THE $\chi^2$ -DISTRIBUTION

The value given is  $\chi^2_{\nu, \alpha}$  where  $P(\chi^2_{\nu} > \chi^2_{\nu, \alpha}) = \alpha$  for the  $\chi^2$  distribution on  $\nu$  degrees of freedom.

For  $\nu > 100$ ,  $\sqrt{2\chi^2_{\nu}} - \sqrt{2\nu - 1}$  is approximately distributed as a standard normal.
