Title: Facilitating teaching of large statistics units using electronic voting system and quizzes

Abstract:

I will present some ideas of using “modern technology” to enhance our teaching: (1) Use of the Mentimeter voting tool to poll students. This can be done during lectures or problem classes to assess students’ understanding and facilitate discussion of topics. **You can bring a smartphone or tablet to participate.** (2) Use of Moodle quizzes to deliver large computer labs. These can be helpful to provide students with immediate feedback and potentially some guidance towards the correct solution.
