

The Matlab Student License allows students to install MathWorks software on **1 of their personally-owned computers** and provides access to other Matlab related resources. You will need to use your university email address to enable the licence.

The following guide will assist you in creating a Matlab account and download and install Matlab.

Download the Installer

1. Create a MathWorks Account using your **university** email address:
www.mathworks.com/accesslogin/createProfile.do
2. Go to the License Centre: www.mathworks.com/licensecenter
3. Check that the academic licence has been applied automatically.
4. Go to: mathworks.com/downloads/web_downloads/select_release
5. Click the download button for the appropriate release: **Note that for Academic Year 2019/20, the campus release is 2019b.**
6. Click the installer button to download the installer.

Install and Activate

1. Locate the installer you downloaded in a file browser. The name of the installer file is:
 - Windows: matlab_<release>_win64.exe
 - Mac OS X: matlab_<release>_maci64.zip
Where <release> represents the release number.
2. Start the installer:
 - Windows: Double-click the installer file you downloaded in the previous step. The Windows Self-Extractor runs, and then the installer starts.
 - Mac OS X: Double-click the installer file you downloaded in the previous step. This action extracts the files and creates another folder called matlab_<release>_maci64, where <release> represents the release number. Inside this folder, double-click InstallForMacOSX to start the installer.
3. In the MathWorks installer, select Log in with a MathWorks Account and follow the online instructions.
4. When prompted to do so, select the license you want to use.
5. Select the products you want to download and install: **XX10190 requires the Symbolic Toolbox.**
6. After downloading and installing your products, keep the Activate MATLAB checkbox selected and click Next.
7. When asked to provide a user name, verify that the displayed local logon user name is correct. Continue with the process until activation is complete.
