

Why become a member of the Bath Geological Society?

Your membership of the Society means that you can attend the following events on our programme free of charge:-

Ten lectures a year covering a variety of geological topics, presented by well-qualified speakers from university professors to research scientists to committed amateurs.

Subjects are likely to include:-

- topics of local interest
- latest research work in the universities
- geological topics with professional, industrial or commercial application.

A number of field trips, usually led by experts in the areas to be visited.

Both our lecture and field trip programmes are designed to appeal to a wide range of interests and we welcome both members with a geological background and those who are novices wishing to develop their interest.

Our Society is affiliated to the national Geologists' Association and thus you are joining the wider geological community with access to much material and interest.
