

# Control Theory Seminars

## Programme, Semester 1, 2010/11

**Time: Thursdays, 12:15**

**Venue: 4W 1.7**

- |               |            |  |
|---------------|------------|--|
| <b>21 Oct</b> | C W Guiver | <i>Operator splitting and evolution equations</i>                          |
| <b>28 Oct</b> | H Logemann | <i>ISS for infinite-dimensional Lur'e systems</i>                          |
| <b>04 Nov</b> | E Sarkans  | <i>The circle criterion for discrete-time input-output systems, part 1</i> |
| <b>11 Nov</b> | E Sarkans  | <i>The circle criterion for discrete-time input-output systems, part 2</i> |
| <b>18 Nov</b> | A Ilchmann | <i>Zero dynamics of differential-algebraic systems</i>                     |
| <b>25 Nov</b> | M R Opmeer | <i>Model reduction, part 1</i>   |
| <b>02 Dec</b> | M R Opmeer | <i>Model reduction, part 2</i>   |
| <b>09 Dec</b> | E P Ryan   | <i>ISS for differential inclusions of Lur'e type</i>                       |
| <b>16 Dec</b> | I Davies   | <i>Integral control in the presence of quantization</i>                    |
