

Short Curriculum Vitae – April 17, 2023

IVAN G. GRAHAM

Emeritus Professor of Numerical Analysis

Department of Mathematical Sciences,
University of Bath, Bath BA2 7AY, U.K.

Email: I.G.Graham@bath.ac.uk

Homepage: <http://people.bath.ac.uk/masigg>

Qualifications: M.A. (Edinburgh, 1975), Ph.D. (UNSW, Australia, 1981).

Publications: 110 scientific papers published or accepted, plus two edited books and an invited survey article in *Acta Numerica* 2012. A full list of publications and preprints can be viewed at <http://people.bath.ac.uk/masigg/publications/>. A list of selected publications is given below. Citation data is as follows:

Google Scholar (April 17, 2023): 5139 citations h-index 41, i10-index 80

Math Sci Net (April 17, 2023): 1957 citations from 1584 authors

Major plenary lectures at large conferences: Dundee Numerical Analysis 1989 and 2005; MAFELAP (London) 2006; ENUMath (Leicester) 2011; WAVES (Tunisia) 2013; Domain Decomposition methods: Greenwich, UK, 1999 and Svalbard, Norway, 2017, ANZIAM annual meeting, Australia 2020.

Fellowships at research programmes: Isaac Newton Institute 2003 and 2007; RICAM special semester, Linz, Austria, 2011 Hausdorff Institute Trimester programme, Bonn, 2017, RICAM Special Semester, Linz 2018, ESI Vienna - UQ programme, June 2022.

Selected invited talks at international workshops: Mathematisches Forschungsinstitut Oberwolfach (16 times); ICMS, Edinburgh (2009, 2010, 2012); Tartu, Estonia (2008); MPI Leipzig (2008); CTAC Canberra (2008); NTU Singapore (2009); Heraklion, Crete (2011); Urumqi, China (2012), Bruchsal, Germany (2013); Zürich (2014); LMS Durham Symposium (2014); Woudschoten, Netherlands (2014); Chinese University Hong Kong (2016); Hausdorff Institute Bonn (2017); Computational Mathematics, Suzhou, China (2018); UNSW Sydney (2018); CIRM Marseille (2019); ANU, Canberra (2019), MPI Leipzig (2021).

Visiting positions: University of Iowa, University of Kiel, University of New South Wales, University of Queensland, Weierstrass Institute Berlin, IIT Delhi and Mumbai, Max-Planck Institute, Leipzig, Caltech (Los Angeles), Isaac Newton Institute, Cambridge, University of Zürich, Chinese University of Hong Kong, University of Hong Kong, National Taiwan University, Matrix Institute, Australia, University of Sydney Mathematical Research Institute.

Postgraduate supervision: 21 successful postgraduate research students (19 PhDs), 9 of which were financially supported by UK companies. Former students include: R. Scheichl (1997-2000, now Professor at Heidelberg University), S. Langdon (1995-1999), now Professor at Brunel University and S. Giani (2004-2008), now Assistant Professor at Durham University.

Postdoctoral supervision: M. Ganesh (92-94), now Professor at Colorado School of Mines; M. Hagger (95-97), moved to industry; L. Stals (97-98), now Associate Professor, ANU, Canberra; E. Vainikko (99-02), now Professor at University of Tartu, Estonia; E. Spence (09-11), now Professor at Bath; T. Kim (11-12), moved to industry; S. Gong (2019-21), now Assistant Professor, Chinese University of Hong Kong, Shenzhen; S. Downing (2022), still current.

Editorial Boards (current): SIAM Journal of Numerical Analysis (since January 2022); IMA Journal of Numerical Analysis (since January 2009); Journal of Computational Mathematics (since July 2017).

Editorial Boards (previous): SIAM Review (2017–2022); Mathematics of Computation (2014–2022); Advances in Computational Mathematics (2012 - 2022), Journal of Integral Equations and Applications.

Research Grant income: My research has been supported over more than 30 years by grants from: UK Engineering and Physical Sciences Research Council (EPSRC), Royal Society, London Mathematical Society, British Council and International Centre for Mathematical Sciences (Edinburgh). A recent project is : “Fast solvers for frequency-domain wave-scattering problems and applications”, 2019-22, funded by UK EPSRC (£380K).

Conference organisation: Boundary Integral Methods, Theory and Applications (Bath 2000); Workshop on Computation of Flow and Transport in Heterogeneous Media (Bath 2006); Numerical Analysis: Multiscale Problems, Adaptivity and Complexity Bath (Bath 2007); LMS Durham Symposium on Numerical Analysis of Multiscale Problems, (Chair, Durham 2010); Special Semester on Multiscale Simulation & Analysis in Energy and the Environment, RICAM Institute, Austria (Autumn 2011, including 2 international workshops), ESI, Vienna, workshop on uncertainty quantification in transport and in high frequency scattering (2022), Solvers for frequency-domain wave problems and applications, University of Strathclyde (2022).

Service outside University of Bath: Elected President of UK and Republic of Ireland Section of Society for Industrial and Applied Mathematics (2017-19), (Elected Vice-President 2001-03). Member of EPSRC Peer Review College (2000-present). External consultant in connection with UK Research Assessment: University of Sussex (2007, 2014, 2021), Strathclyde University (2012). External Advisor: CEMAT, Institut Superior Technico, Lisbon (since 2010).

External Examinerships: Heriot-Watt University, Sept 1997 - June 2000, Strathclyde University, Sept 2001 - June 2004, Sussex University, Sept 2006 - June 2010 (all undergraduate) and Manchester University/UMIST, 2001-2004 (MSc).

Departmental Service: Head of Mathematics Group, University of Bath, 2001-2004; Head of Department of Mathematical Sciences (i.e. Department Chair), University of Bath, 2012-15.

Selected publications

(Full list: <http://people.bath.ac.uk/masigg/publications/>)

Efficient solvers for frequency domain wave problems

- [1] S. Gong, I. G. Graham and E.A. Spence, Convergence of Restricted Additive Schwarz with impedance transmission conditions for discretised Helmholtz problems, *Math. Comp.* 92 (2023), 175-215.
- [2] S. Gong, M.J. Gander, I.G. Graham, D. Lafontaine and E.A. Spence, Convergence of parallel overlapping domain decomposition methods for the Helmholtz equation, *Numer. Math.*, 20 Sept 2022, DOI: 10.1007/s00211-022-01318-8.
- [3] I.G. Graham, E.A. Spence and J. Zou, Domain Decomposition with local impedance conditions for the Helmholtz equation with absorption. *SIAM J. Numer. Anal.* 58(5), 2515–2543 (2020).
- [4] I.G. Graham, E.A. Spence and E. Vainikko, Domain decomposition preconditioning for high-frequency Helmholtz problems with absorption *Math. Comp.* 86 (2017), 2089-2127.
- [5] M.J. Gander, I.G. Graham and E.A. Spence, Applying GMRES to the Helmholtz equation with shifted Laplacian preconditioning: What is the largest shift for which wavenumber-independent convergence is guaranteed? *Numer. Math.* 131 (2015), no. 3, 567–614.

Uncertainty quantification

- [6] M. Bachmayr, I.G. Graham, V. K. Nguyen and R. Scheichl, Unified Analysis of Periodization-Based Sampling Methods for Matérn Covariances, *SIAM J. Numer. Anal.* 58 (2020), 2953–2980.
