

MA50196: Financial Derivative  
Informal Week 4 questionnaire, Autumn 2019  
Summary of main issues raised, and responses.

- Lecture delivery. Mainly positive comments about the use of the board. Some issues of speed of delivery (too fast for some, too slow for a few others).

Action: Can't really reduce the speed without cutting material. Will consider dropping some of the non-essential material (or at least move it to background reading) in future years.

- Use of notes. Generally positive response to the typed notes. Some requests to make the notes available earlier.

Action: Make the notes available online beforehand (this was already being done), maybe a few days before (this wasn't being done and is sometimes hard to manage in practice, but will try!)

- Interaction and communication. Some students wanted more of this.

Action: Maybe will ask more questions in problems class; it is hard to involve everybody given the size of the class.

- Issues with the lecture room for Tuesday mornings.

Action: trying to find a better room for this slot. Not possible every week.
