

Paper Plane

a b d e

a b c e

Notes The shape of the model can be varied by adjusting the points b, c, and d. The distance b–c controls the size of the tail fins, which determine stability in flight. Forgoing the cuts in the bottom left diagram also results in smaller tail fins. Actual dimensions used in the instructions above are as follows (for A4 paper, with these instructions printed at 100%).

a b c d e
